

**SMAC MAC Address Changer Software****1**

- ◆ Received a DoD contract
- ◆ PC World Award recipient
- ◆ Over 1.5 Million downloads
- ◆ Used by US Government Agencies
- ◆ Used by Fortune 1000 companies
- ◆ Supports Windows 2000, XP, 2003, VISTA, 2008, and Windows 7

**SMAC** MAC Address Changer is a powerful, yet an easy-to-use and intuitive Windows MAC Address Modifying Utility. It allows users to change MAC address for almost any Microsoft Certified Network Interface Cards (NIC) on Windows 2000, XP, 2003, VISTA (32 & 64 bit), and 2008 (32 & 64 bit) systems, regardless of whether the manufacturers allow this option or not. SMAC is developed in the USA by an U.S. company, and it has over 1,500,000 downloads.

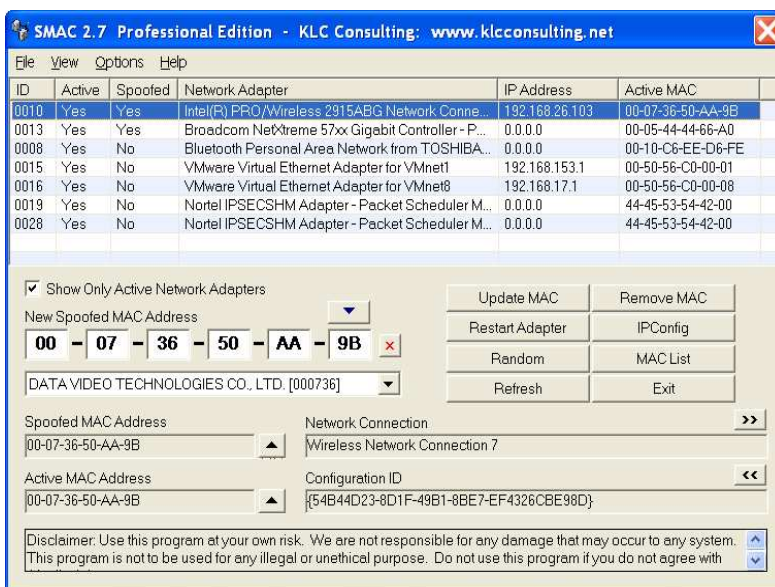

Our federal government customers include Dept of Defense (DOD), Dept of Homeland Security (DHS), Dept of Interior (DOI), Dept of Justice (DOJ), Federal Aviation Administration (FAA) Ministry of Defense (UK), Intel, Dell, Boeing, Cisco, Panasonic, Microsoft, and etc.

**Capabilities**

- ◆ Protect Wi-Fi wireless privacy by hiding the real MAC Address
- ◆ Help network and IT security professionals troubleshoot network problems
- ◆ Conduct network penetration tests by spoofing MAC Addresses
- ◆ Test network access control by spoofing MAC Addresses
- ◆ Assess Intrusion Detection / Prevention Systems with spoofed MAC Addresses
- ◆ Investigate capabilities of the network management tools with spoofed MAC Address
- ◆ Test Incident Response Plans by simulating network incidents
- ◆ Attain high availability by building two identical systems with identical MAC address
- ◆ Recover (MAC Address specific) software licenses when the network adapter fails or when software vendor goes out of business
- ◆ Train network and security professionals about MAC Address insecurity
